

STAINLESS STEEL

SANITARY, WATER WASHDOWN PACKAGING EQUIPMENT

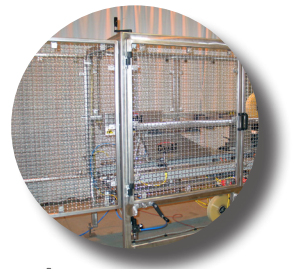

Maintaining a pristine production and packaging environment is critical for food manufacturers. One of the key features that they look for when purchasing processing and packaging equipment is that it be 100% wash down. The main criterion for wash down packaging equipment is stainless steel construction. Stainless steel resists corrosion and pitting caused by cleaning agents and aggressive food ingredients.

Combi Packaging Systems offers sanitary, water wash down packaging equipment constructed from U.S. stainless steel and your choice of NEMA rated electrical components. Our simple, open designs allow for easy decontamination of all exposed surfaces.

Angle and tube design.
Continuous weld, welded studs
and sleeves used on frames

Stainless Steel Wire
Mesh Guarding

ERFOPACK® HAND PACKING STATION
2-EZ® SB SSTL Ergopack®

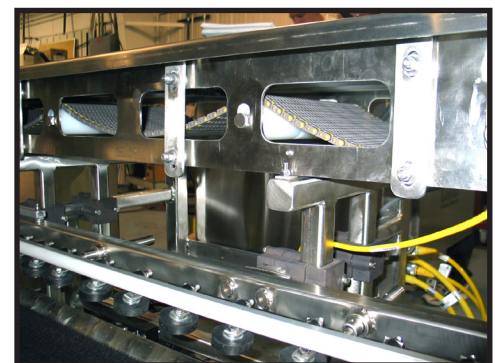

Stainless Steel or composite
electrical enclosures

NEMA 4 compliant electrical
motors and reducers

STAINLESS STEEL SANITARY CONVEYORS

- Box tube frame construction with minimal horizontal surfaces; niche-free with no food traps or hidden corners where product can accumulate
- Washdown motors and gearboxes
- Food grade bearings
- UHMW used for wear strips, return supports and guide rails

STAINLESS STEEL

FRAME:

- U.S. 303/304 Grade Stainless Steel
- Angle and tube design. Continuous weld, welded studs and sleeves used on frames
- SSTL foot bolts, fasteners, sprockets, chain, all-thread & shafts, where feasible
- No more than 1" square contact between parts
- Stud weld offset covers, spacers used

ELECTRICAL:

- Wire stand offs and spacing
- Stainless steel or composite electrical enclosures
- Stainless NEMA 4X HMI enclosures
- Washdown motors and reducers

INTERNAL COMPONENTS:

- IP65 rated valves and vacuum source
- Pneumatic air line spacers
- Air line and wire separators
- Composite bearings

Ultra-compact Drop Packers with or without Integrated Case Erectors

Side Loading Horizontal Loaders with or without Integrated Case Erectors

Case Erectors, Bottom Tapers to erect and seal small to extra large cases from 8 to 35 cases per minute

Automatic, Heavy Duty Case Sealers, Stand-Alone or System Integrated, top and/or bottom sealing up to 50 cases per minute

Top loading Servo Pick and Place Packers featuring multi-axis servos for precise and safe placement of products into erected cases
